## Fee Schedule for Building/Electrical/Mechanical/Plumbing/Low Voltage/Demolition Permits

Adopted in Legal Assembly September 16, 2013

**Building Permit** – Permit fee is ½ of 1% of the “actual contract cost” of the general construction work including the trades, minimum \$50. You will be required to submit a copy of the contract with the Building Permit Application. \$50 administrative fee in addition to permit fee. **NOTE: Homeowner’s applying for a new construction building permit the fees will be based on material and labor costs for the general construction and all trades.**

**Electrical Permit** - Permit fee is 2% of the “actual contract cost” of the electrical work with a minimum of \$50. You will be required to submit a copy of the contract with the Electrical Permit Application. \$50 administrative fee in addition to permit fee.

**Low Voltage Permit** – Permit fee is 2% of the “actual contract cost” of the low voltage work with a minimum of \$50. You will be required to submit a copy of the contract with the Low Voltage Permit Application. \$50 administrative fee in addition to permit fee.

**Mechanical Permit** – Permit fee is 2% of the “actual contact cost” of the mechanical work with a minimum of \$50. You will be required to submit a copy of the contract with the Mechanical Permit Application. \$50 administrative fee in addition to permit fee.

**Plumbing Permit** – Permit fee is 2% of the “actual contract cost” of the plumbing work with a minimum of \$50. You will be required to submit a copy of the contract with the Plumbing Permit Application. \$50 administrative fee in addition to permit fee.

Note: Fee for replacing an existing hot water heater will be an administrative fee of \$50 only.

**Demolition Permit** – Permit fee \$100.00 regardless of structure size or materials

**Re-Establishing Disconnected Electrical Service** - \$35.00 permit fee, no additional administrative fee

**Re-Inspection Fee** - \$100.00 per re-inspection. **Fee to be paid prior to re-inspection.**

## AID TO CONSTRUCTION FEE

### Section 98-57 City Ordinance for Construction Fee

- (a) In order to connect to the City of St. Marys water and/or wastewater utility system, all residential, commercial, institutional, industrial or any other structure requiring water and/or wastewater utility services, shall pay an aid-to-construction fee in addition to any fees required by ordinance prior to connecting to the city water and/or wastewater system.
- (b) The aid-to-construction fee will be based upon improvements needed for the water or wastewater infrastructure and construction or expansion of the water or wastewater treatment facilities serving the city. The city currently has three wastewater treatment facilities with another facility being proposed for future development. The current wastewater treatment plants are known as the Point Peter Plant, Weed Street Plant and Scrubby Bluff Plant. Each aid-to-construction fee will be based on the expansion or construction needed for any and all improvements or expansions of the water and wastewater plants serving the city. These fees will only be used for the improvement or expansion of the water and wastewater treatment facilities located within the city.
- (c) The aid-to-construction fee for commercial subdivisions and/or structures, and residential subdivisions and/or structures shall be calculated based on the estimated average daily water consumption of each type of structure or unit as outlined in Table 98-57.1, multiplied by the estimated construction cost per gallon, as listed in the fee ordinance, then multiplied by the number of units. The estimated aid-to-construction cost per gallon shall increase May 1 of each succeeding year, beginning in May 2010, at a rate of five percent. If the proposed use is not included in Table 98-57.1, then the daily average water consumption rate shall be determined by the mayor and council and/or their designee.

Owner/Developer of any structure shall have the option of providing an Earthcraft or LEED (Leadership in Energy and Environmental Design) certified facility that may modify the daily average water consumption rate as listed in Table 98-57.1. The aid-to-construction fee shall be the lower of the figures derived from using either figures from 98-57.1 or the LEED or Earthcraft certified figures. The City will only accept certified LEED or Earthcraft figures from a current Georgia registered professional engineer or current Georgia registered architect.

For example: for a 2011 development with 50 units of one bedroom apartments the fee would be GPD (Table 98-57.1) X Cost Per Gallon X Unit Total = Aid-To-Construction Fee or  $150 \times \$12.58 \times 50 = \$94,350.00$  would be the aid-to-construction fee.

- (d) Aid-to-construction fee for commercial or residential projects that do not require subdivision review and approval shall be paid with submittal of a request for a building permit. Aid-to-construction fee for commercial or residential subdivisions shall be paid prior to submittal of final subdivision approval by the Planning Commission.
- (e) Any addition(s) made to the current structure shall pay an aid-to-construction fee in an amount of either the added estimated water consumption resulting from any addition to the current structure(s) or an amount based on square footage of the proposed addition, whichever is smaller, using Table 98-57.1. Addition shall be defined as a physical addition to the existing structure, and not interior renovations or building envelope renovations. Added estimated water consumption shall be

defined as the difference between the current number of fixtures and their related consumption. Earthcraft and LEED certification may also be used for existing structures. The relocation of one or more fixtures within the same existing building envelope will not require an aid-to-construction fee.

- (f) For any commercial or residential subdivision, a final plat will not be submitted to city council for approval until after receipt of any related fees – including the aid-to-construction fee. For projects not requiring subdivision, a building permit will not be issued until after receipt of any related construction fees – including the aid-to-construction fee. Engineering plans will not be approved until after receipt of any and all construction fees.
